PROJECTS

AdsAble AI — AI-Powered Ad & Video Generation Platform

- Built a full-stack AI advertisement and video generation platform integrating Google Veo and image-generation APIs to produce promotional videos with synchronized audio.
- Implemented Clerk authentication, subscription management, Stripe-driven billing webhooks, and a token-based credit system to gate usage.
- Modeled and queried application data with Prisma ORM on NeonDB (PostgreSQL), and designed REST APIs deployed in a production-ready architecture.

CLOTHIQ — Full-Stack E-Commerce Platform (MERN Stack)

- Developed a MERN-stack e-commerce platform covering authentication, payment processing, and order management end to end.
- Secured user sessions with JWT-based authorization and SendGrid OTP email verification; integrated Stripe for checkout.
- Built REST APIs for product catalog, cart operations, inventory tracking, and order management; deployed on Vercel with uptime monitoring for reliability.

ExcelWeb — Form Data Management & Tracking System

- Built a responsive web app (HTML, CSS, JavaScript) for collecting and managing user service requests with dynamic table generation.
- Implemented client-side data handling for efficient record management and an interactive, structured presentation layer.
- Deployed on Vercel using a serverless architecture for reliable access.
